Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a Final Office Action in response to communication received on 01 March 2004. Claims 1, 3 and 4 have been amended. Claims 1-4 are pending in this application.

Response to Arguments

2. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by USPN 6,337,971 B1 to Abts.

As per claim 1, the Abts reference discloses in combination with mechanized irrigation components and ancillary equipment therefore for irrigating a field comprising a wireless RUI (see column 7 lines 43-45, "pager 130"; column 7 lines 52-57, "cellular or touch-tone phone 150") comprising a handheld display (see column 7 lines 47-51, "display 132") and keypad (see figure 1, "pager 130, cellular or touch-tone phone 150") for (a) reading the status (see column 7 lines 47-51, "current status") of irrigation components ("pivots 20") and ancillary equipment (see column 9 lines 1-10, "other field sensors") and (b) controlling (see column 7 lines 52-57, "control signals") the irrigation components ("pivots 20") and ancillary equipment ("other field sensors").

As per claim 2, the Abts reference discloses said wireless RUI ("pager 130, cellular or touch-tone phone 150") has the capability of reading the status ("current status") of the irrigation components ("pivots 20") and ancillary equipment ("other field sensors") and controlling ("control signals") the same from any location (see column 7 lines 45-46, "remote location 140").

As per claim 3, the rejection of claim 1 is incorporated and further claim 3 contains limitations recited in claim 1; therefore claim 3 is rejected under the same rationale as claim 1.

As per claim 4, the rejection of claim 1 is incorporated and further claim 4 contains limitations recited in claim 1; therefore claim 4 is rejected under the same rationale as claim 1.

Conclusion

5. No claims are allowed.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art with respect to remote monitoring and control of irrigation systems in general:

USPN 5,760,706 to Kiss

USPN 6,343,255 B1 to Peek et al.

USPN 6,453,215 B1 to Lavoie

USPN 6,529,589 B1 to Nelson et al.

USPN 6,701,665 B1 to Ton et al.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
